JOINTS.

TGC[®] ACTIV MAINTAINS HEALTHY JOINTS AND ACTIVE LIFESTYLE.

You take care of your body by keeping fit and active. However do you know that your active lifestyle may accelerate damage to your joints and eventually cause severe joint problems in old age?

As we age, our daily movements wear out our cartilage. Glucosamine is needed to keep our cartilage healthy and to regenerate the damaged parts. Unfortunately it cannot be found in our normal diet and this is why most elderly people suffer joint discomfort and inflexibility.

TGC[®] Active uses Lynk Biotechnologies' Revolutionary Transdermal Technology to deliver glucosamine directly to the joints to maintain them in tiptop condition. Using TGC[®] Active daily will greatly reduce the risk of severe joint problems in old age.

KEEPS YOU MOVING EVERY DAY.

WIN A FREE Tube of TGC Activ 75g
(Worth S28)

Every 20th person who supplies his details at www.lynkbiotech.com/activepromo will receive this gift.

State the code no. **ST031108ACT** for this promotion. Limited to one entry per person and multiple entries will be totally disqualified.
